

- Worked in an early-stage startup that builds a budgeting platform for multi-family properties
- Engineered a dynamic formula bar feature, allowing users to customize property drivers; resulted in a 50% decrease in budgeting errors and saved users an average of 22 hours per week during the budgeting season
- Architected and executed a robust feature that empowers users to effortlessly edit thousands of rows, utilizing virtual scrolling, optimized API calls and database transactions, resulting in a 40% reduction in user onboarding time

- Actively collaborated with the founding team to align the architectural framework with product vision, optimizing for speed-to-market, and facilitated a successful launch of 3 new features within 4 months
- Worked with React, TypeScript, GraphQL, Prisma, AWS, LaunchDarkly, GitHub, Figma, and Python

Software Engineer

Google

August 29th 2022 - March 5th 2023

- Worked in the YouTube - Living Room, Connected Experiences team as a full-stack engineer
- Led the credential transfer work for a YouTube Shorts casting project, and authored a design document on its implementation
- Developed a cast device sharing feature called playback awareness using TypeScript and Java
- Maintained the YouTube and YouTube Music apps on Nest devices using TypeScript and Java
- Helped resolve a PO bug that affected 5% of Nest Hub users while performing my weekly on-call duty
- Contributed to product excellence work in the YouTube iOS app using Obj-C, Xcode, and other internal tools

Software Engineer

Egen Solutions

July 23rd 2019 - August 22nd 2022

- Worked in an Agile team of a health-tech startup client as a front-end engineer
- Led the cross-team UI revamp project to optimize loading time and give more power to the users
- Developed the front-end for a data-driven application using React, Redux, TypeScript, D3.js, and Enzyme
- Developed a RESTful API written in Python, Flask, Postgres, and PyTest
- Contributed to the data engineering pipeline using Airflow and Google Cloud Platform
- Configured an error tracking solution with Airbrake, and a data analytics dashboard with Pendo
- Contributed to IAC tools using Terraform, and working with Concourse, Jira, InVision, and Datagrip

Software Engineer, Intern

StratiFi Technologies Inc.

May 29th 2018 - August 10th 2018

- Worked in a small, agile engineering team of a young, disruptive FinTech startup in San Francisco
- Developed the UI for multiple projects using Bootstrap, Chart.js, D3.js, and JQuery
- Developed the front-end for several projects using React, Redux, Handlebars, SCSS, Bootstrap, and Docker
- Led the migration of a huge static website to WP-Engine, and set up Mailchimp forms to handle subscribers
- Worked with Django REST Framework, Jira, Confluence, CircleCi, Netlify, Git, AWS S3, MySQL, and Postman

EDUCATION

Binghamton, NY

Binghamton University

August 2017 - May 2019

- Master of Science in Computer Science

Navi Mumbai, India

University of Mumbai

August 2012 - May 2016

- Bachelor of Engineering in Electronics

ADDITIONAL EXPERIENCE AND AWARDS

- **Convener, Student Association (2015-2016):** Organized a technical festival, hosted a graduation ceremony, managed members of the organization, and obtained several sponsorships for the events.

LANGUAGES AND SKILLS

- HTML5, Handlebars, CSS, CSS modules, Sass, Tailwind, Bootstrap
- JavaScript, TypeScript, React, Playwright, Vitest, Zod, React Query, Redux, Node.js, Python
- AWS, MongoDB, PostgreSQL, MySQL, Git, Netlify, Docker, Jenkins, GraphQL, Prisma, GCP, WP-Engine
- LaunchDarkly, Twilio, SendGrid, Mintlify
- Datadog, Airflow, Airbrake, Google Analytics, Google Tag Manager, InVision, Figma
- Cursor, Claude Code, MCP, AWS Bedrock, GitHub Copilot
